Quick Start Guide (Android)

Group IT

Intune enrollment

Group IT | May 2024

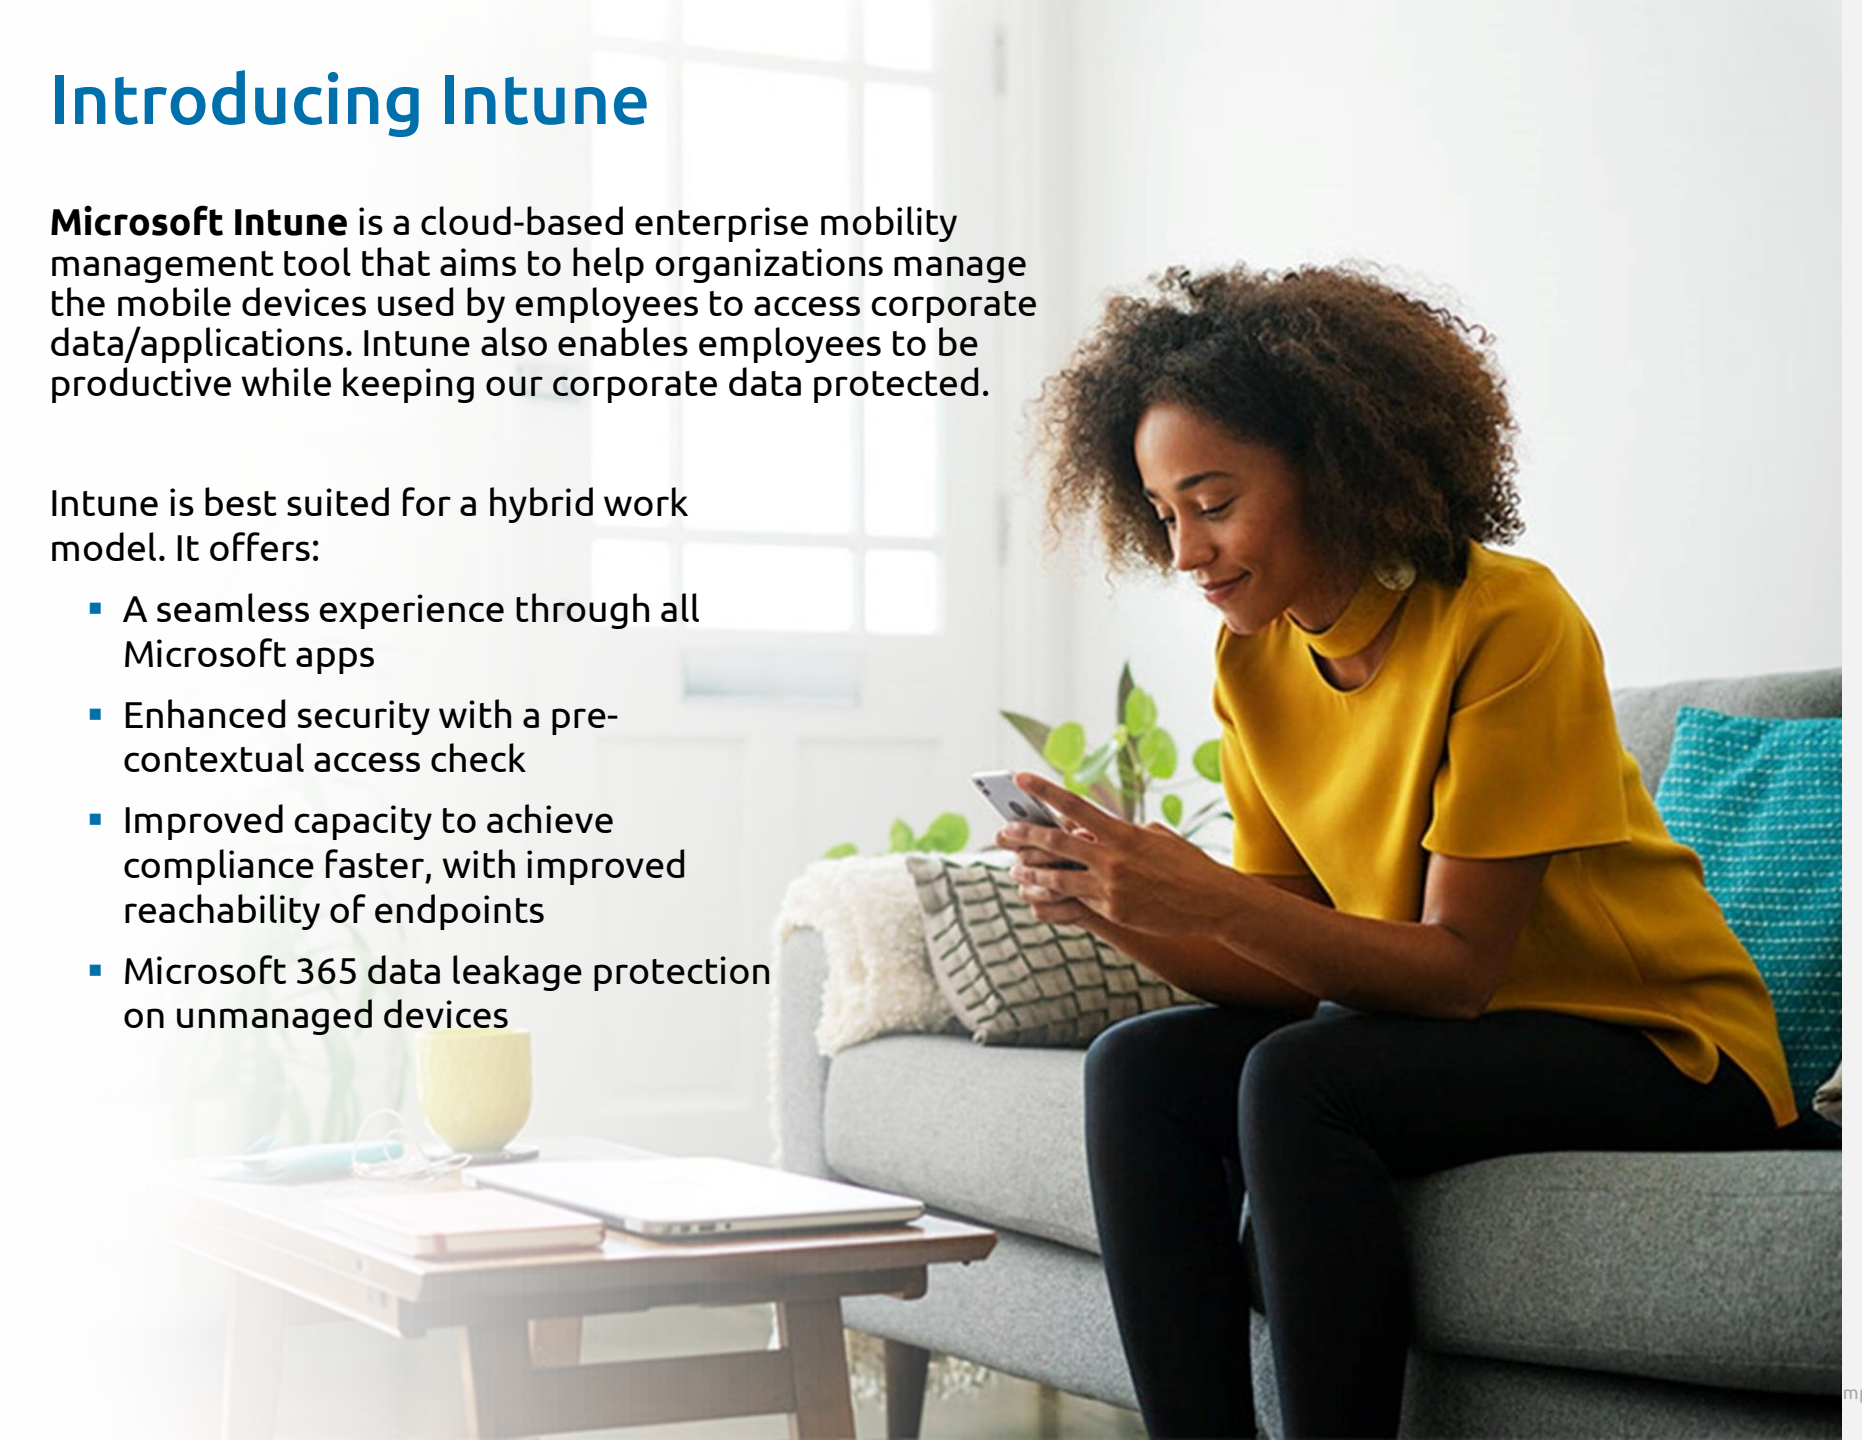
Capgemini

Introducing Intune

Microsoft Intune is a cloud-based enterprise mobility management tool that aims to help organizations manage the mobile devices used by employees to access corporate data/applications. Intune also enables employees to be productive while keeping our corporate data protected.

Intune is best suited for a hybrid work model. It offers:

- A seamless experience through all Microsoft apps
- Enhanced security with a pre-contextual access check
- Improved capacity to achieve compliance faster, with improved reachability of endpoints
- Microsoft 365 data leakage protection on unmanaged devices



Microsoft Intune

Easily enroll your Android mobile device to Microsoft Intune for Capgemini in two easy steps:

STEP 1: Enroll your device with Intune

STEP 2: Install and activate all required apps and complete the setup

NOTE: Please ensure that you follow the **exact** procedures mentioned in this guide.

mpany Public © Capgemini 2024. All rights reserved |

Prerequisites

- **Supported OS:** Android 10 and above
- **Active Authentication app: PingID** should be accessible
- A stable internet connection
- Google Play Store access

Before you begin

Important things to know:

- Intune does not support:
  - Mobile devices which do not support Android Enterprise
  - Android GO operating system
  - Rooted mobile devices
- The options and the screens may slightly differ depending on your mobile device's make and model.
- Remove all Microsoft apps, including Outlook and Teams, that are configured with your Capgemini account. These will be automatically reinstalled or you can install them again once you successfully enroll to Intune.

- Keep this guide handy and preferably accessible from your PC.
- Follow each step mentioned in the guide. Please do not skip any step.

If you have questions or need assistance, please contact Group IT Service Desk.

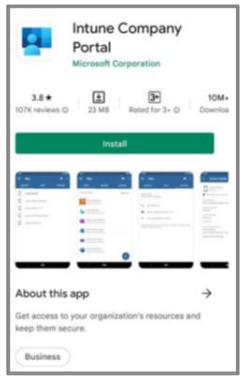
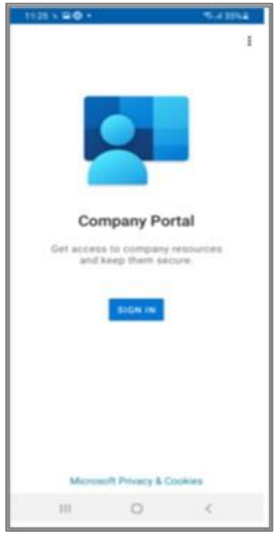
STEP 1

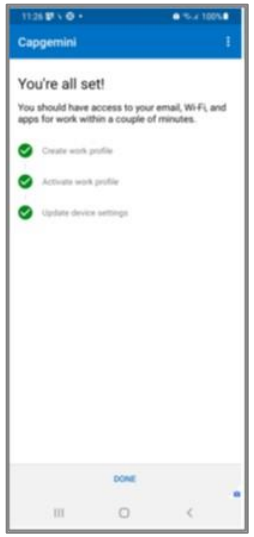
Enroll your mobile device with intune

Group IT

Enroll your mobile device with Microsoft Intune







1. On your Android device, visit the **Play Store** and install the **Intune Company Portal** app.
2. Launch the **Company Portal** app and tap **SIGN IN** to enter your **Capgemini email address.** Then tap **Next.**
3. Your Corporate ID will be automatically populated. Enter your **PingID passcode** and tap **BEGIN** to start the enrollment process.

4. Read and accept the policy notices and tap **CONTINUE**. Follow the onscreen instructions.

The app creates a containerized area (Work profile) on your device that separates Capgemini data from your personal data. Allow some time to create your work profile.

NOTE: The options and the screens may slightly differ depending on your mobile device's make and model.

5. Tap **CONTINUE** to follow the onscreen instruction to create Capgemini Access Setup and then tap **DONE**.

Your device enrollment with Intune is now complete.

Now follow the instructions on the next pages and set up all the required apps.

STEP 2

Install and activate all required apps and set up your Capgemini account

Group IT

Inside Intune

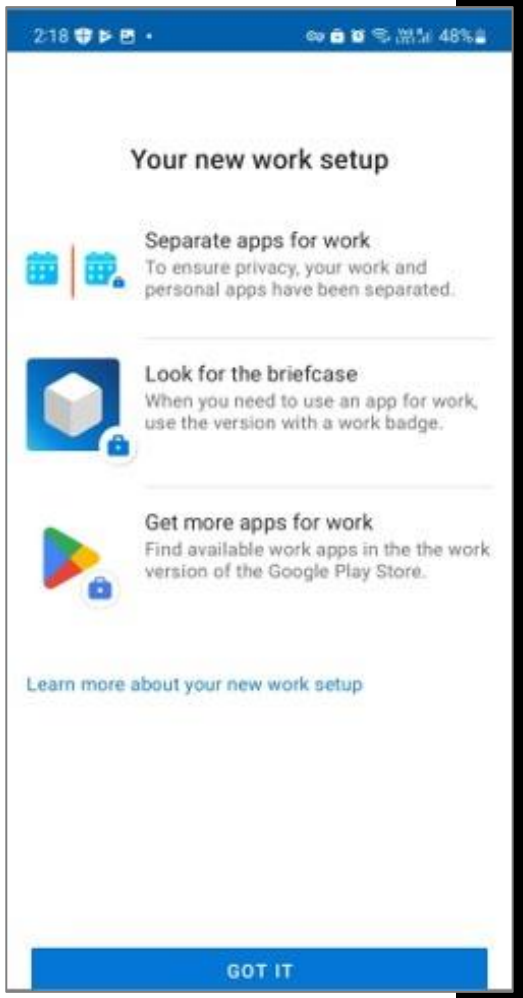
Intune creates a separate Work profile inside the **Work** profile, you will see all the Capgemini apps that you need for your work. The following apps will be installed automatically on your mobile device after enrollment:

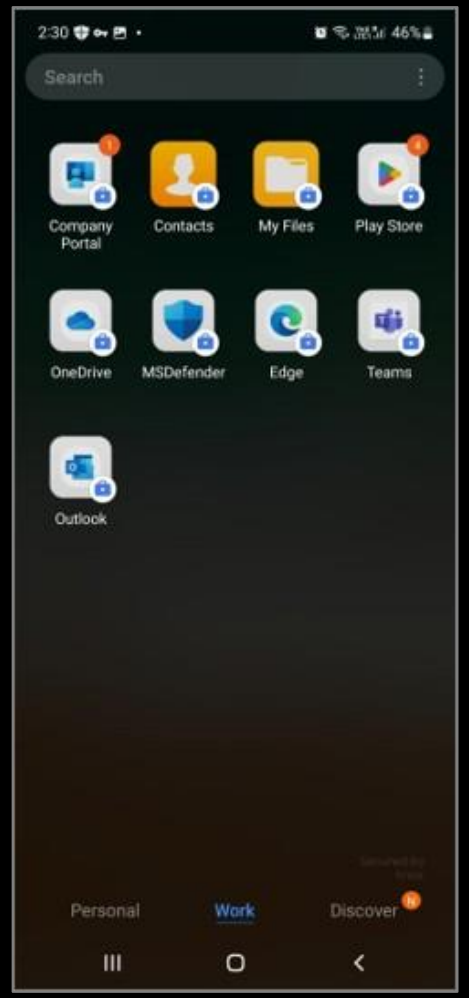
- **Outlook** – app for your email
- **OneDrive** – storage solution
- **Microsoft Teams** – chat and collaboration app
- **Edge** – web browser
- **Microsoft Defender** – used for secure intranet connection

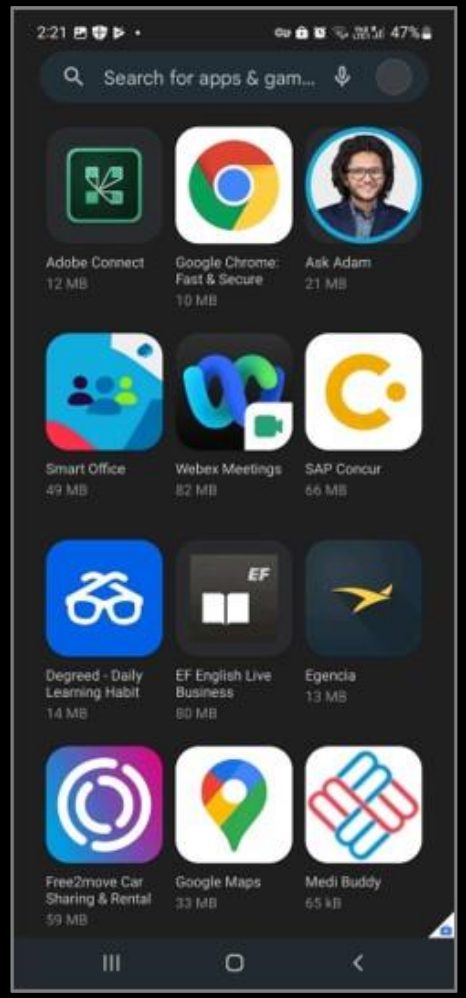
IMPORTANT:

Always use the managed **Play Store** for downloading Capgemini apps (Concur, Office 365, Egencia, CRES SmartOffice etc.).

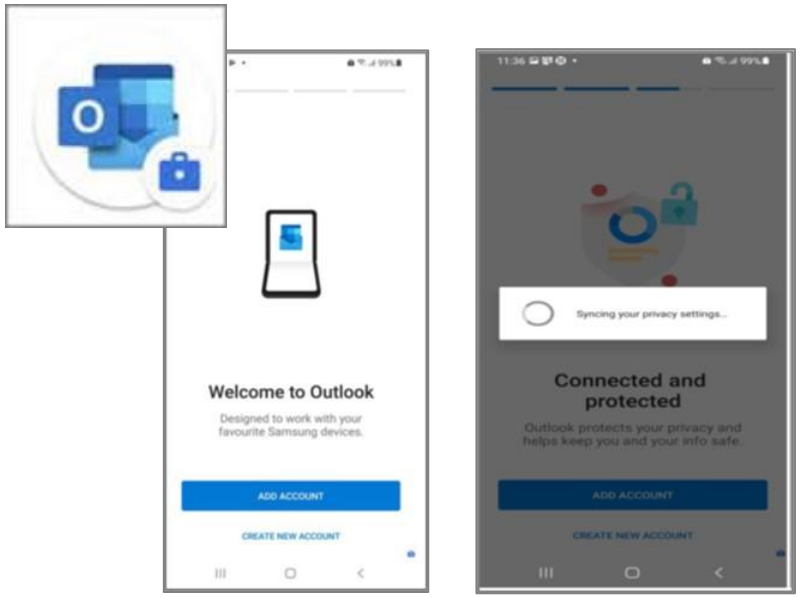
All managed apps in the Work profile appear with a briefcase icon on them.



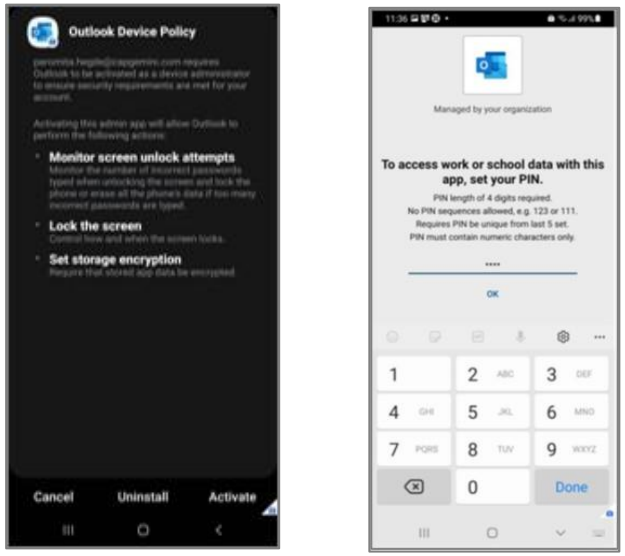




Set up the required apps: Outlook

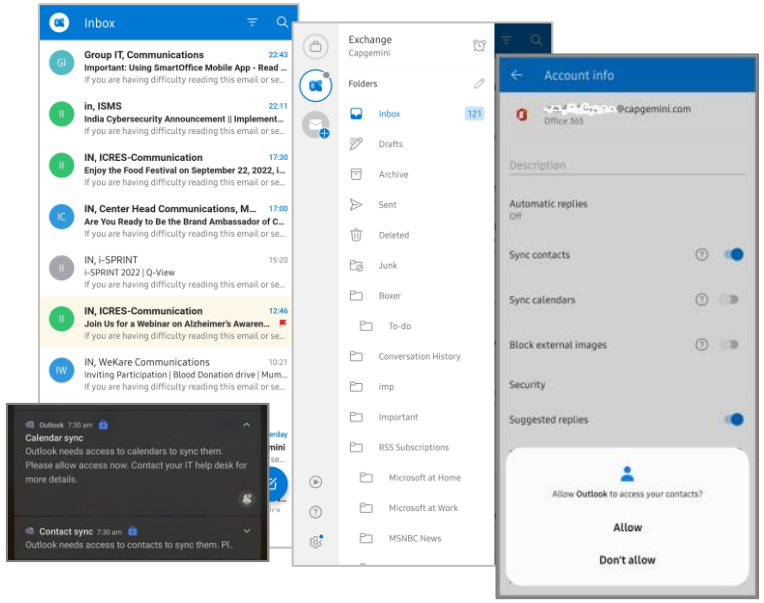


1. From your **Work** profile, open the managed **Outlook** app and tap **ADD ACCOUNT**.
2. Enter your **Capgemini email address** and tap **CONTINUE.**
3. On the next screen, tap the **Outlook** icon to choose the account type. Re-enter your Capgemini email address and tap **Next.**



4. Read the Outlook Device Policy and tap **ACTIVATE**. To secure your Capgemini account tap **Activate this device admin app**.
5. Tap **MAYBE LATER** to avoid adding another account in Outlook and follow the on-screen instructions.
6. Set up a 4-digit PIN to secure your Capgemini apps (one-time process) and tap **OK**. Renter the PIN and tap **OK** to confirm.

NOTE: Please take note of this PIN as it will be required to access all apps in the **Work** profile.



7. Allow permission to sync your **Outlook Contacts** if you wish to have them available in your mobile device contact list.

Your Outlook email is now configured!

To explore swipe options, Quick templates, Conversation views, Out-of-Office response and many more, tap **Inbox/Image** then tap **Settings** (gear icon) on the left bottom.

See **ADDITIONAL SETUP** to learn about providing delegation and enabling biometric access.

Set up the required apps: Teams and OneDrive

Microsoft Teams

From your **Work** profile, open the **Teams** app and enter your **Capgemini email address** or (if available) tap your **Capgemini ID**.

Click **Sign In** and follow the onscreen instructions. Wait for the automatic login and syncing to happen.

Your Microsoft Teams is ready for collaboration!

OneDrive

From your **Work** profile, open the **OneDrive** app and tap **Allow** and then tap **Sign in**. Enter your **Capgemini email address** and tap **Continue** and follow the onscreen instructions. Wait for the automatic syncing and setup to complete.

When prompted, read and accept the data protection notification.

Your OneDrive is up!

Set up the required apps: Defender and Edge

Set up MSDefender first and then Microsoft Edge

MSDefender

MSDefender is required to use the Edge browser.

From your **Work** profile, open the **MSDefender** app and enter your **Capgemini ID** if prompted or tap your **Capgemini account**. Read and accept the license terms. Wait for the automatic login and syncing to happen.

NOTE: You will see a persistent notification on your mobile device for **VPN status** – which is expected behavior. Please ignore these and will not impact your personal apps.

Your device has successfully created a secure corporate network!

Microsoft Edge

From your **Work** profile, open **Edge**. On the top left corner, tap the **Add Account** icon (human figure with + sign). Tap **Accounts** and select your **Capgemini email address** and tap **Sign in to Sync**. Click **Continue** to log in and sync to complete.

Your Microsoft Edge is up!

Edge is the default browser to access corporate websites.

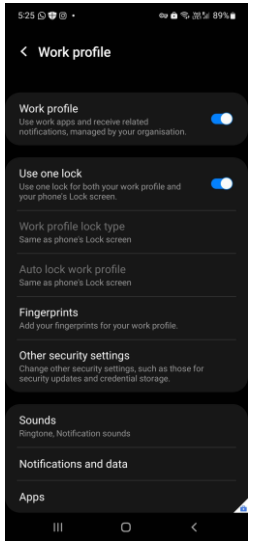
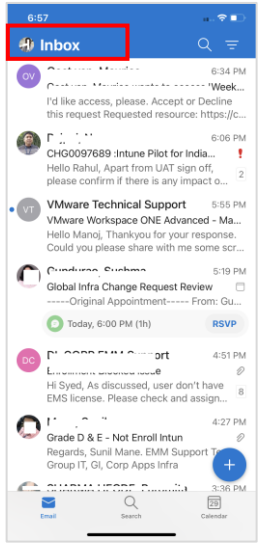
ADDITIONAL SETUP

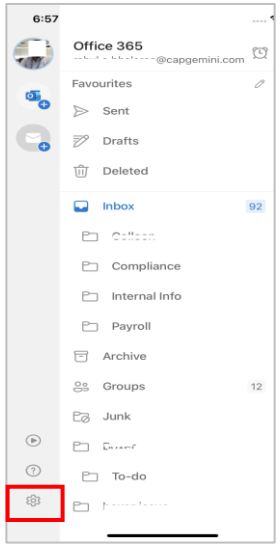
Set up biometrics and delegates

Group IT

Set up biometric authentication and add Outlook delegates







Add Fingerprint authentication for Work profile

To enable fingerprint authentication (if not enabled by default) on your mobile device for Work profile apps:

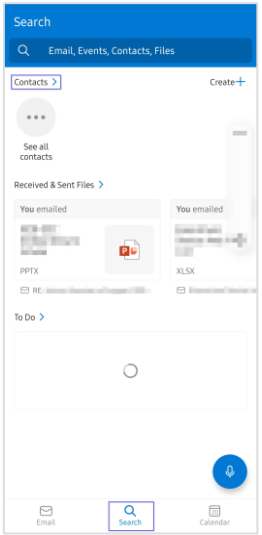
1. Samsung Device: Go to **Settings > Work Profile**. Tap **Fingerprints** to add your fingerprints for your work profile.
2. Other Devices: Go to **Settings > Security & Location > Work Profile Security > Advanced > Fingerprints**.
3. Confirm your device PIN and follow the onscreen instructions to complete the fingerprint setup.

Add delegated account to your Outlook mailbox

1. On **Outlook** app, tap your image in the top left corner.
2. Tap the gear icon at the bottom left to open Outlook settings. Tap **Add Account** and then tap **Add Shared mailbox**.
3. Enter the alias of the mailbox that you have been granted access to.

Company Public © Capgemini 2024. All rights reserved |

Search contacts in Outlook



On the **Outlook** app, tap the search icon at the bottom. The Search screen appears as shown in the screenshot. Enter a name to search in saved contacts.

- Tap **Contacts** to view the contacts saved on your Outlook.
- Swipe right to see all contacts.
- Tap **Create** to add more contacts.

NOTE: The options will vary from device to device. The above procedure is the generic steps that you need to follow.

FAQs

Q. Is it safe to use Intune and its apps on my personal device? What about my privacy?

A. Microsoft Intune only collects information that is required to provide secure corporate access. When you enroll a device, you give your organization permission to view certain pieces of information on your device, such as device model and serial number. Your organization uses this information to help protect corporate data on the device

Q. Can I have another MDM platform on my mobile device and still use MS Intune from Capgemini?

A. No. If the device is enrolled to another MDM platform, it cannot be enrolled with Capgemini Intune. In such a case, you may have to use an alternate device to access Capgemini applications on mobile device.

Q. How can I differentiate the common apps between my personal profile and my work profile?

A. Work profile apps will have a briefcase icon.

Q. I'm already using Outlook to access my personal emails on my mobile device. Can I continue to use two instances of Outlook?

A. Yes. You can continue to use the Outlook App in your personal profile.

Q. Why am I unable to uninstall MS defender and VPN is always-on?

A. MS defender is for establishing VPN access to Intranet resource, and it is a mandatory app. Hence, this app cannot be uninstalled. For uninterrupted access to Intranet resources, VPN is set as always-on.

Q. Why MS Defender showing notification for VPN Tunnel Status or Device Risk?

A. Microsoft Defender app displays a persistent notification for the VPN tunnel status and "Device is at Risk" (for some Android devices) in the mobile notification area. Please note there is no functional impact to any other Microsoft apps like Outlook, Teams, OneDrive etc. even Tunnel or any other personal apps. Also, your device is not at risk. Please ignore these notifications.

Q. Can I configure client's Outlook and Teams with Outlook and Team managed through Capgemini Intune?

A. No, Capgemini Intune does not allow the client mailbox (Intune) and Capgemini mailbox (Intune) to co-exist on the same mobile device.

Q. Who can help me if I have a problem with Intune?

A. Contact Group IT Service Desk.

To learn more about Intune and refer to additional FAQs, please see Microsoft Intune Talent.
